**Morningstar Rating™**

## Investment Objective

The Fund seeks to achieve long term equity returns with a moderate level of risk through a well diversified portfolio across asset classes.

This share class is hedged into USD. The aim is, as far as possible, to replicate the performance of the GBP share class. This is achieved by entering into forward currency contracts equal to the net asset value of the USD share class.

## Fund Manager Commentary

The Fed increased rates by 75 bps alongside a 50bps increase by the Swiss from minus 0.75% to minus 0.25%. The Bank of England increased by 25bps; three of the nine members of the Monetary Policy Committee voted for a 50bps move. As a result, bond yields moved higher across the duration curve; in the US, the 10-year yield increased 35 bps to 3.10% whilst the UK was up 27 bps to 2.37% and the Swiss 33 bps to 1.16%.

Evidence is building of a slowdown in economic activity though it has tended to be confined to areas of consumer-related activity. In the US, new housing starts fell in May by 14% to their lowest level in a year.

Elsewhere, consumer confidence surveys are hitting new lows, with France, for example, registering its lowest reading for 10 years. The Equity allocation was the main driver of returns, though alternatives and bonds were also detractors. Equity performance was led by the Europe, UK, and US, though all other regions delivered declines. Bonds were impacted by their duration positioning. Alternatives suffered from the weakness of its gold and commodity exposure. The trading strategies were flat over the month.
